

# Sage Payment Solutions

## Sage Virtual Terminal

Process payments conveniently online - everywhere, every time! The Sage Virtual Terminal is a secure, reliable and cost-effective solution for authorizing and managing payment transactions. This exceptional product works with the Sage advanced payment gateway to allow businesses, that don't typically see their customers, to easily process credit card and electronic check payments over the internet. Additionally, level 3 processing is available for government, corporate, and purchasing cards. The Virtual Terminal is accessible 24/7 from any internet enabled computer and has robust reporting features. As an added bonus, e-commerce businesses have the opportunity to get a free shopping cart.

### Top of the line Security

Sage Payment Solutions takes every effort to be secure by going beyond the required PCI (Payment Card Industry) data security standards to protect both merchant and consumer data. The Sage Virtual Terminal safeguards your customers' data by storing it behind our firewall, rather than on your computer. Additionally, the Virtual Terminal provides security and fraud prevention features like Address Verification Service (AVS), Card Verification Value (CVV and CVV2) and a staff of risk specialists monitoring transactions to protect merchants and minimize chargebacks.

### Recurring Billing

Businesses that bill customers regularly can give customers the convenience of setting up automatic payments through the Sage Virtual Terminal. Customers can pre-arrange to make these payments directly from their bank account or charge their credit card. This solution is well received by consumers and is also advantageous to the business by ensuring prompt payment and making billing and collections easier and more efficient.

### Electronic Checks

Save time by processing checks electronically through the Virtual Terminal rather than making trips to the bank. Check information is entered at the time of purchase and sent to the Federal Reserve's Automated Clearinghouse (ACH) for funds transfer in as quickly as 72 hours. Other advantages of accepting checks include lower processing costs than credit cards and minimized internet fraud through real-time customer identification by Equifax.

#### WHAT'S IN IT FOR YOU?

- Securely processes both credit card and check payments 24/7
- Convenient 24 hour access to online reporting
- Includes automated recurring billing and scheduling at no extra cost
- Integrates with accounting software
- Level 3 processing capability
- No installation or upgrade required
- Free shopping cart
